

Conclusion

ARROW® VPS G4™ Device

Conclusion

- Education for clinicians on how to use the ARROW® VPS G4™ will shorten the learning curve when performing bedside procedures
- The clinician may review this education at any time upon observing unusual cases at bedside.
- Elimination of chest x-ray will establish a new standard at your facility while:
 - Reducing X-ray exposure
 - Assisting with work flow issues associated with chest X-ray
 - Giving the clinician the assurance to complete the procedure without delays
 - Providing greater patient satisfaction knowing the central line is properly placed

Conclusion

Thank you for taking the time to review this Implementation Education
We are confident that it has met your expectations and will assist you in
the implementation of ARROW® VPS G4™ Device at your facility
