

ARROW® VPS G4™ Device

Implementation Education
For ARROW® VPS G4™ Vascular Position System®

Table of Contents

1. Preface and vision
2. Introduction
3. Factors affecting catheter tip placement
4. Principles of ECG
5. Understanding the role of ECG in tip placement
6. Principles of Doppler
7. Tip placement with Doppler
8. Combining ECG and Doppler

Table of Contents

- 9. ARROW® VPS G4™ Device case studies
- 10. Clinical troubleshooting and best practice
- 11. Setting up the ARROW® VPS G4™ Device for implementation
- 12. Summary of benefits of using the ARROW® VPS G4™ Device
- 13. Conclusion
- 14. Thank you

Objectives

- The clinician will understand all modules of implementation
- Using the tools provided in this education, the clinician will instigate full implementation and in many cases eliminate the need for the confirmatory chest X-ray

Goal of Zero

- Making zero complications a reality
- Reduction of catheter-related infections and thrombosis due to catheter malposition

Introducing the ARROW® VPS G4™ Device
